

MOVING BED ANAEROBIC REACTOR

New Anaerobic Bio-Reactor, taking a method of Moving Bed Bio-Carrier, resulting high loading rate and high speed organic wastewater treatment

Key Features:

- More than three times faster than other anaerobic treatment systems.
- Bio-carriers holds microbes stably and the biomass washout is limited.
- Applicable for wide range concentration of organic wastewater.
- Methane gas obtained is available as a power source for gas generator, etc.

Application:

- Breweries and beverage industry
- Distilleries and fermentation industry
- Food Industry
- Pulp and paper.
